

HOME POWER CONSUMPTION FORM

- 1.) I fill in the cell how many people are in our home.

NUMBER PEOPLE HOUSING	4
-----------------------	---

- 2.) I look at the electricity counter and write down the date and the reading

DATE	READING
03/03/11	256320

- 3.) If I use Natural Gas or Gasoil, I do the same

- 4.) If I use BOTTLED BUTANE or PROPANE, I write down the date when I begin the bottle and the quantity of the bottle.

Initial date	Quantity (Kg)
23/02/10	15,5

- 5.) If I use private car, I fill in how many Liters/100Km it consumes and look at the Km counter and I write the reading. If I have 2 cars, i fill in it too.

Consum (l/100Km):	6
-------------------	---

	Date	Reading (Km)
Car 1	03/03/11	98560
Car 2	03/03/11	112650

- 6.) After a month more or less, I read the electricity counter again and write donw.

DATE	READING
03/03/11	156320
05/04/11	157150

- 7.) And the same with Natural Gas, Gasoil, and cars. The calculate sheet does the rest.
